Learning Outcomes

- Analyze student thinking using research-based learning progressions in early numeracy to recognize how students develop numbers sense and additive reasoning
- Use interviews, tasks, and observations to collect meaningful evidence of student reasoning
- Plan and adjust instruction using students' zones of understanding and grade-level standards
- Build students' confidence and identity as capable mathematical thinkers

Course Dates/Location

June 8-11, 2026
8:30-3:30

San Juan College
Farmington, NM

Numeracy Foundations provides educators with practical tools to observe and notice student mathematics and use this information to inform instruction.
